Cleveland, OH 44106 | 412-721-4987 | enysahroberts1212@gmail.com

CAREER OBJECTIVE

Undergraduate researcher studying the cellular mechanisms underlying breast cancer progression and therapeutic response. Interested in using chemical biology and mechanistic studies to identify vulnerabilities in treatment-resistant diseases and progress the discovery of small molecule therapeutics. Long-term goal of pursuing a career in drug design to advance translational biomedical research in chronic diseases with limited options.

EDUCATION

Bachelor of Arts in **Biochemistry** with a minor in **Religious Studies** *Expected May 2027*
Case Western Reserve University (CWRU)

Relevant Coursework: Organic Chemistry (Lab), Elementary Computer Programming, Structural and Computational Biology, Introduction to Biochemistry, Molecular Biology, Antimicrobial Therapies, Basic Statistics

SKILLS

Lab: pipetting**,** cell culture, drug treatment, protein extraction, western blotting, immunofluorescence, quantitative image analysis

Computer: Microsoft Excel, PowerPoint, Google Docs/Sheets/Slides, Image J, GraphPad

Instrumentation: Keyence BZ-X810 Fluorescence Microscope, Incucyte, Promega Glomax Explorer Plate Reader, Li-Cor Odyssey CLx Imaging System

RESEARCH EXPERIENCE

Undergraduate Research Student, Cancer Sciences Department, Cleveland Clinic, Keri Lab *February 2025 - Present*

- During the academic year, I investigate the effect of focal adhesion kinase (FAK) inhibition on the chromosomal stability and centromere regulation of invasive lobular carcinoma (ILC)
- Maintain ILC cell lines, perform routine cell culture, passaging, and experimental preparation
- Execute immunofluorescence assays to identify mitotic defects and centrosome abnormalities in ILC cells treated with targeted drug inhibitors

CanSUR Research Intern, Case Comprehensive Cancer Center, Keri Lab *June 2025 - August 2026*

- Funded 10-week program that supports my ongoing lab work

Undergraduate Research Student, CWRU Biochemistry Department, Kao Lab *March 2024 - February 2025*

- Investigated the role of PML1 as a tumor promoter in estrogen receptor-positive (ER+) breast cancer by performing and analyzing western blots on samples with ESR1 mutations associated with endocrine resistance and poor prognosis
- Participated in weekly lab meetings and literature reviews, critically evaluating primary research on topics outside the focus of the lab to review various mechanisms of other chronic diseases
- Collaborated closely with a graduate student mentor to gain hands-on experience in experimental design and data interpretation

Student Researcher, UPMC Hillman Cancer Center, University of Pittsburgh *July 2021 - August 2022*

- Conducted mentored research under University of Pittsburgh faculty, investigating the role of p53 in lipid metabolism of *c. elegans* and characterizing ER+ tumors in rat models by performing techniques including protein extraction, gel electrophoresis, and Western blotting to analyze protein expression
- Presented research findings at regional and national science fairs, developing skills in data interpretation, scientific writing, and oral presentation

PRESENTATIONS

"Exploring the Role of FAK in the Centrosome Vulnerability of Invasive Lobular Carcinomas"
Intersections Undergraduate Research Symposium, CWRU, *2026*
Award: 2nd place in Life Science Category
"Characterization of ER+ Tumors in Rat Models"
Pennsylvania Junior Academy of Science, *2023*
Award: 2nd place in Biochemistry category
"The cell autonomous and non-autonomous role of p53/*cep-1* in lipid metabolism "
Pennsylvania Junior Academy of Science, *2022*
Award: 1st place in Biochemistry category

OTHER EXPERIENCE

Operations Associate, CWRU Thwing Student Center *August 2026 - May 2027*

- Provides customer service by assisting students, faculty, staff, and guests, processing transactions, and managing lost-and-found inventory
- Supports Student Center operations by setting up events, maintaining facility organization and cleanliness, enforcing policies, and assisting with emergency response procedures

Team Member, Burger King, Monroeville, PA *May 2024 - January 2025*

- Provided outstanding customer service and handled customer complaints effectively
- Trained and supervised ten staff members, providing feedback for areas of growth in order to strengthen team
- Maintained accurate inventory count of all products to ensure smooth running of business
- Upheld proper food sanitation standards by strictly adhering to all food handling safety protocols

Debutante, Pittsburgh's 97th Cinderella Ball *July 2022 - May 2023*

- Participated in volunteer opportunities and personal development seminars with other debutantes to prepare for our futures then concluded the year of philanthropy with a celebratory evening

ACTIVITIES

Spirit Captain, Member, CWRU's Division I Ultimate Frisbee Club, *August 2023 - Present*
Volunteer, University Hospitals Seidman Center, *September 2024 - December 2025*
Volunteer, Bolton Elementary, *January - April 2024*
